

MESHTEC
Advanced Mesh Solutions

Genuine Meshtec™ 10-Year Warranty

When purchasing **MESHTEC™** products you can be assured of consistent quality, high corrosion resistance and a comprehensive 10—year product warranty. A simple regular cleaning and maintenance program will ensure that the performance, appearance and functionality of **MESHTEC™** products are preserved for many years to come.

To maintain the **MESHTEC™** warranty, it is essential to follow the suggested **MESHTEC™** Care Guide.

Meshtec™ Care Guide

MESHTEC™ stainless steel mesh is highly corrosion resistant. However, all mesh types can act as a filter that trap airborne dust, dirt, and impurities causing visual defects to your doors and screens. In order to keep **MESHTEC™** products looking and performing at their best correct maintenance and care is essential. Please follow the specific cleaning advice to ensure your **MESHTEC™** product warranty is not voided.

- Regularly clean your screens in accordance with environmental factors:

Environment	Description	Cleaning Interval
Mild	Not close to the ocean, e.g. rural, remote from urban and industry.	Every 6 months
Moderate	Urban area, inland and away from industry.	Every 2 to 3 months
Extreme	Within 10 km of a coastline, being coastal/marine and subject to salt deposition, or heavy industrial areas.	Every 2 to 4 weeks
Marine	Within 500m of beachfront.	Every 1 to 2 weeks

Recommended Cleaning Method

- to clean, wash down the mesh and frame using a soft cloth, suggested detergent and water, taking care to remove any excess moisture or water when done;
- avoid using any sharp objects or materials with your screens and doors to prevent visual defects;
- external contaminants that come into contact with **MESHTEC™** screens such as bird dropping are very acidic and can quickly burn and damage the powdercoat finish. These external contaminants must be cleaned immediately with a suggested mild detergent or **MESHTEC™** Mesh Care Wash & Wax and soft mitt.
